topics

The workshop will include presentations and discussions on:

The energy challenge

- How will the global energy system evolve?
- How much fossil, nuclear and renewables will be required?
- How much investment will be needed?
- Outlook for oil and gas prices

Pushing the boundaries with financial instruments

- Project finance and reserve based lending – strategies and key considerations
- New thinking for multi-lateral financing
- Debt capital markets – an attractive option?
- Private equity – a viable option at today's oil price?

Financing strategies – best practice and innovative thinking

- Financing E&P
- Infrastructure and inventory financing
- Insights from NOC's, IOC's and independents – what is the appetite for risk in a changing landscape?
- Legal insight – increasing transparency and regulatory changes
- Insurance implications
- Capital structures, balance sheet and commodity interest rate hedging
- Financing unconventional
