

**European Power Market Summit:
Today's trends, power for tomorrow
Towards a common vision for European electricity markets?
5 – 6 October 2016
Hotel Amigo, Brussels**

5 October 2016

17:30 Arrival of participants

18:00 Welcome by Jean-François CONIL-LACOSTE, Chairman of Management Board, EPEX SPOT SE

18:15 Keynote by Christophe GENCE-CREUX, Head Electricity Department, European Agency for the Cooperation of Energy Regulators (ACER)

Power markets and regulation – towards a new balance?

19:00 Networking cocktail

6 October 2016

09:00 Welcome and opening address from the Co-Chair – Professor Jean-Michel GLACHANT, Director Florence School of Regulation

09:15 Session 1: European power grids and markets – an ever closer union through economics or regulation?

Co-Chair – Professor Jean-Michel GLACHANT, Director Florence School of Regulation

4 speakers (15min each); Chair to summarise (5min); Discussion (25min)

How are power systems evolving? How are these changes impacting existing electricity power markets? How shall we think about: slow grid expansion in the context of increasing renewable penetration and flexible power generation needs? What balance between the power markets and the legal framework?

- **Call for faster grid expansion and build-up of interconnectors: TYNDP 2016 and beyond**
Mrs Bente HAGEM, Chair of the Board ENTSO-E, Stattnet SF
- **CACM Implementation and the changing European power market dynamics**
Mr Andreas TIREZ, Director Wholesale Markets, Regulatory Commission for Electricity and Gas, CREG, Belgium
- **European Power grids and markets: View from the Trading floor**
Mr Domenico DE LUCA, CEO, Axpo Trading AG, Switzerland
- **US & EU Experiences in Power Market Design**
Mr Manuel BARITAUD, Senior Energy Analyst – Electricity, International Energy Agency, Paris

10:45 Coffee break

11:15 Session 2: European power market integration and its critics – is regionalisation the new paradigm? Co-Chair – Mr Remko BOS, Vice President CEER, Vice-Chair of ACER Board of Regulators, Director Energy, Authority for Consumers and Markets (ACM)
3 speakers (15min each); Chair to summarise (5min); Discussion (40min)

How is the grid managing congestions in light of increased renewables power production? Do we need new market structures, alternative pricing schemes and management in existing markets? What role for vertical market coupling endeavours? What is the state of our experience with existing energy, ancillary services, and/or capacity markets for supporting decarbonisation goals?

- **Market Design Package: the decisive step towards a common design of the power market?**
Mr Oliver KOCH, Deputy Head of Unit Internal Market – Wholesale markets Electricity & Gas, Directorate-General for Energy, European Commission
- **Power markets and Decarbonisation goals in 2030? Which synergies?**
Mr Juan Jose ALBA RIOS, Chair of Eurelectric Markets Committee, Chair of the ENTSO-E Advisory Council, Vice-President Regulatory Affairs Endesa
- **Reviewing market design for a better integration of large shares of RES**
Professor Carlos BATLLE, Associate Professor with Comillas Pontifical University's Institute for Research in Technology (IIT) in Madrid, Visiting Scholar at the Massachusetts Institute of Technology's MIT Energy Initiative (MITEI)

12:45 *Walking lunch in the venue*

14:15 Session 3: Innovation in European power markets: will the new trends disrupt or provide opportunities to energy trading?
Co-Chair – Peter STYLES, Member of the Board EFET – Principal Consultant, Stratos Energy Consulting, 4 speakers (15min each); Chair to summarise (5min); Discussion (25min)

How do renewable energy, storage, demand response and other zero-carbon technologies currently participate in wholesale markets? What is the role of distributed generation and storage resources (VPP, Batteries) in power systems? Are the new trends being driven by government subsidies and intervention or do the new trends represent genuine technology driven disruption based on market principles?

- **enera: The next big step in the energy transition**
Mrs Ines KOLMSEE, CTO of EWE AG, Germany
- **InnoGrid 2020+: Quo vadis in 'Digital Energy'?**
Mr Roberto ZANGRANDI, Special Advisor, EDSO for Smart Grids
- **How to guarantee the access of Demand-side flexibility to power markets?**
Mrs Frauke THIES, Executive Director SEDC - Smart Energy Demand Coalition
- **Digitalisation – a view from the trading floor**
Mr Andreas BADER, Vice President Shift Trading & Market Access, Statkraft Markets GmbH

15:45 Synthesis discussion by Co-Chairs
Jean-Michel GLACHANT, Remko BOS, Peter STYLES
Moderator: Andrew CLAXTON, Senior Advisor, EPEX SPOT SE

Closing Remarks

Jean-François CONIL-LACOSTE, CEO of EPEX SPOT SE

16:15 End of event
